

Did you give answers to the 3 questions?

To find out how much you involved your patients in decisions about their care and treatment, please complete the survey below. To compare your answers with your patient's answers, enter a patient identifier here:

Please complete this survey **straight after their appointment**

Was there a decision to make about healthcare or treatment? For example, did you discuss whether or not to give treatment, or talk about which treatment to choose?	Yes	-	No
Did you tell your patient about their different options?	Yes	Unsure	No
Did you tell your patient about the benefits and risks of each option?	Yes	Unsure	No
Did you tell your patient how likely the benefits and risks are?	Yes	Unsure	No
Did you ask your patient what mattered to them?	Yes	Unsure	No

Ask 3 Questions

Sometimes there will be choices to make about healthcare. If you ask your patient to make a choice, make sure you give them the answers to these 3 questions:

What are my
options?

What are the possible **benefits and risks** of those options?

How **likely** are the benefits and risks of each option to occur?

We want to know what's important to you
